DUPLEX PRINTING PROCESS

LIMITED
TO 2
COLORS

**Our USA Made Exclusive
Print Process
2-Sided Bandanna
Imprinting**

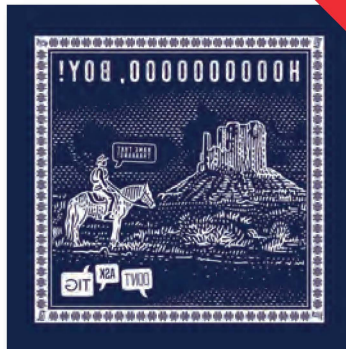

The fabric is printed on both sides in Duplex Printing. With this method a clear outline is produced on both sides of the fabric. The design is applied so skillfully by the printing cylinders that the result may be mistaken for a woven pattern.

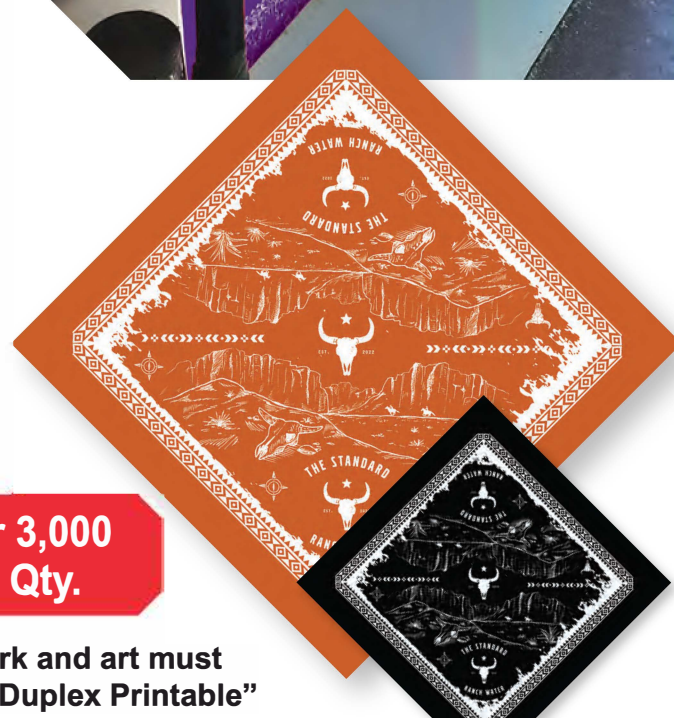

FRONT

Front side is right reading

BACK

Back side is not a mirrored image,
but the color is 100% saturated as front.

Additional benefits:

- Innovative Printing (two sides with pigment dyes)
- Custom PMS Bandanna Color
- Initial screens are included in the price
- Restrictions involved - ONLY a 1 or 2 color design will work and art must be reviewed by our art department to see if the design is "Duplex Printable"

More spot colors, blends to
photo quality representation

**More detailed rotary printing
design options with the benefits
of stochastic dot color separations.**

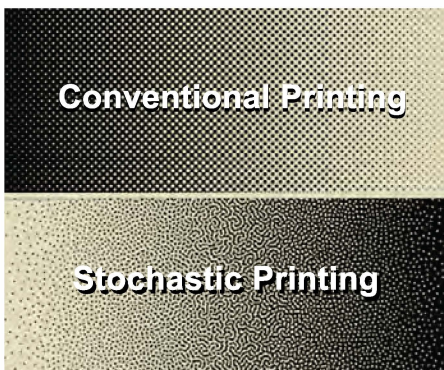

Improved image quality — Stochastic screening offers more life-like tonal representations and a broader spot color offering. As a result, you get finer details, smoother tones, and a continuous blended appearance that almost looks like the original image.

Sharpness and detail — This technique prevents the “whiteness” of the printing paper from bleeding through the ink. Also, there is sharper edge definition and enhanced stabilization in high-speed printing. With stochastic dot color saturation and accuracy will provide more consistent ink coverage throughout each job.

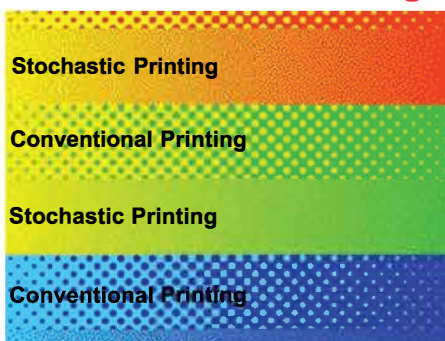

Reduction in visible dot patterns — These imperfections are typically more noticeable in traditional halftone printing, which reduces the overall quality of the finished product.

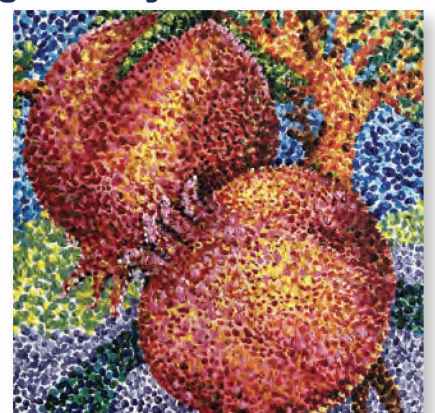

**Stochastic Printed Bandanna
